

Competency Models

- Competency: “...a specific, identifiable, definable, and measurable skill or characteristic that is essential for the performance of an activity within a specific business or industry context.”
- A competency model is a clear description of what a worker needs to know and be able to do – the knowledge, skills, and abilities – to perform well in a specific job, occupation, or industry.

Renewable Energy

The Employment and Training Administration (ETA) worked with technical and subject matter experts from the Department of Energy, Office of Energy Efficiency and Renewable Energy (EERE), the National Renewable Energy Laboratories (NREL), and several industry associations to develop a competency model for renewable energy. The model supports workforce preparation for jobs in energy technologies that strengthen the economy, protect the environment, and diversify the U.S. energy system. The model is designed to evolve along with changing skill requirements.

The industry model frameworks are based on the competency model building blocks which are modified to meet the industry needs. Scroll down to view the industry model selected. OR Click on Industry Competency Models on the top navigation to view the Building Blocks.

Develop Curriculum

Audience: Teachers, Curriculum Coordinators, Instructional Systems Specialists, Program Administrators, Career Technical Education Supervisors, Curriculum and Assessment Directors, Corporate Trainers, and Technical Trainers, may find this page helpful.

Competency models identify the knowledge, skills, and abilities necessary for success in an occupation or industry. This information can be used to develop and evaluate competency-based curriculum to ensure workers fulfill industry needs and are prepared to face work-related challenges and activities.

Step-by-step

Worksheet

Curriculum Development and Evaluation:

Development: To build a curriculum based on an existing competency model, the relevant competencies must be translated into learning objectives. Learning objectives are statements that describe ways that students can demonstrate mastery of the competency in an educational setting. Curriculum developers can then devise lesson plans that will take learners to the desired level of competency.

Evaluation: Competency models are a resource for evaluating existing curriculum to ensure that it addresses business and industry's needs. Compare the learning objectives of the curriculum to the model's competencies to identify which knowledge, skills, and abilities are insufficiently addressed. For example, a program or department administrator may ask individual educators to compare their course content with a model's competencies to better align course goals with intended program outcomes.

Use the [Curriculum Analysis Worksheet](#) to develop or evaluate a curriculum using a competency model.

	A	B	C	D	E
Curriculum Analysis					
Use this worksheet to identify the knowledge, skills, or abilities to include in your curriculum. Alternatively, you can use the worksheet as a check sheet to indicate which competencies are not currently addressed by existing courses.					
Competencies (from model)	Course 1	Course 2	Course 3	Not Addressed	
1. Laws and Regulations: Knowledge of relevant local, state, and federal laws and regulations that impact the health industry					
Critical Work Functions:					
• Apply the fundamentals of privacy and confidentiality policies and procedures	■				
• Comply with applicable federal and state laws, policies, regulations and legislated rights of clients		■			
• Practice responsibly within the ethical framework of the Patients' Bill of Rights	■				
• Understand the legal responsibilities, limitations, and implications of actions	■				
• Comply with policies and requirements for documentation, information security and record keeping				■	
• Keep up to date on standards and government regulations		■			
• Follow agency/facility policies and procedures					■
Technical Content Areas:					
Client/Patient					
• Client/Patient Bill of Rights			■

Introduction to the Tools

Build a Competency Model

Build a Career Ladder/Lattice

The Competency Model Clearinghouse offers two tools designed to help businesses, educators, and workforce professionals achieve their talent development goals: the **Build a Competency Model Tool** and the **Build a Career Ladder/Lattice Tool**.

The **Build a Competency Model Tool** will guide you through the development of a competency model that identifies the knowledge, skills, and abilities needed to perform successfully in your industry. Then, the **Build a Career Ladder/Lattice Tool** will help you build career ladders/lattices that outline critical experiences individuals need to progress through a career in your industry.

Follow the links provided on the left side of your screen to review general information about competency models and career ladders/lattices as well as specific information about the tools. You are strongly encouraged to review the instructions and go through the tutorials before building your competency model or career ladder/lattice.

Build a Career Ladder/Lattice

Example Career Lattice for the Long-term Healthcare Industry

Uses for Competency Models

- Communicate Industry Needs
- Career Exploration and Guidance
- Career Paths, Ladders, and Lattices
- Workforce Program Planning & Labor Pool Analysis
- Curriculum Evaluation, Planning, and Development
- Human Resource Services
- Certification, Licensure, and Assessment Development
- Registered Apprenticeship Programs

How the models have been used

- Business/workforce/education partnerships identify solutions to address workforce skill needs
- Private company developed their own competency model for manufacturing solar turbines
- Geospatial program courses reviewed to cover elements of agreed upon competency model
- Building out a career pathway program—with education/training and stackable credentials to meet business demand
